

For Sophie’s journey, user stories were created from real rental scenarios to prioritize what the prototype must test first. (1/2)

User Story	Scenario	Scenario details	User value	Business value
 S01 Occasion start	Sophie is invited to a wedding and does not want to buy a dress she will wear once.	As Sophie, I want to start from the occasion I need to dress for, so that I can quickly find pieces that feel right for that moment.	5	5
 S02 Look inspiration	Sophie has only a vague idea of what she wants to wear.	As Sophie, I want to browse looks curated by occasion, so that I can understand what style direction could work before choosing a piece.	5	3.5
 S03 My size first	Sophie finds beautiful pieces, but many are not available in her size.	As Sophie, I want to see pieces available in my size first, so that I do not waste time on items I cannot wear.	4.5	4
 S04 Date availability	Sophie needs the outfit for a fixed date.	As Sophie, I want to check availability for my rental dates early, so that I only compare pieces that can actually be booked.	5	4
 S05 Price comfort	Sophie has a budget for the event.	As Sophie, I want to filter by price range, so that I can stay within budget while still finding something desirable.	3.5	4
 S06 Nearby option	Sophie prefers a practical pickup or delivery option.	As Sophie, I want to see pieces close to me or easy to collect, so that the rental does not add stress before the event.	3.5	4
 S07 Fit proof	Sophie sees a piece she likes but is unsure how it really fits.	As Sophie, I want clear photos, fit notes and condition details, so that I can judge whether the piece will look right in real life.	5	4.5
 S08 Owner confidence	Sophie hesitates because she does not know the person renting the item.	As Sophie, I want to understand who the owner is through profile, reviews and wardrobe style, so that renting from a stranger feels safer.	3	2

-  Occasion-first Discovery
-  Fit & Availability Confidence
-  Trust-before-booking Layer
-  Complete Look Support
-  Service Clarity Before Booking

For Sophie’s journey, user stories were created from real rental scenarios to prioritize what the prototype must test first. (2/2)

User Story	Scenario	Scenario details	User value	Business value
S09 Full look	Sophie wants an outfit, not just one isolated item.	As Sophie, I want to know whether several pieces from a look are available together, so that I can build a coherent outfit for my event.	3.5	3
S10 Rental rules	Sophie worries about cleaning, deposit, late return or damage.	As Sophie, I want rental rules to be clear before booking, so that I know exactly what I am responsible for.	3	1
S11 Booking recap	Sophie is ready to book but wants one last check.	As Sophie, I want a final booking summary with dates, price, delivery, deposit and return conditions, so that I can confirm without uncertainty.	3	2
S12 Save options	Sophie compares several options over a few days.	As Sophie, I want to save pieces or looks, so that I can come back later and compare my options calmly.	4.5	1
S13 Follow wardrobe	Sophie discovers a wardrobe that matches her style.	As Sophie, I want to follow wardrobes I like, so that I can return to them for future occasions.	4	1.5
S14 Ask before book	Sophie has one practical question before committing.	As Sophie, I want to ask the owner a question about fit, pickup or delivery, so that I can remove the last doubt before booking.	3	4
S15 Help at doubt	Sophie does not understand a rental rule at the booking moment.	As Sophie, I want help to appear exactly when I have a doubt, so that I can continue without leaving the booking journey.	2	4
S16 Review after	Sophie has completed a rental.	As Sophie, I want to leave a review after the rental, so that future renters can make more confident decisions.	1	3
