

Prototype V1 focuses on the renter role, covering the **journey from initial trigger to transaction completion**; return and post-rental steps are out of scope.

Step 1 : Occasion & Inspiration

User actions:

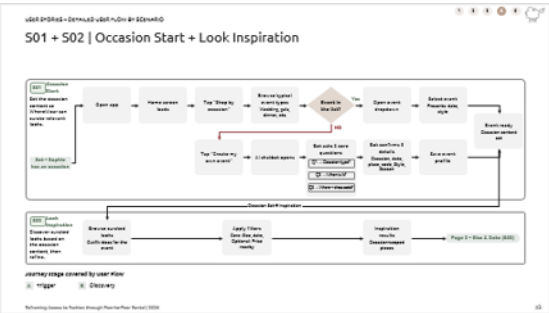

Sophie opens WhereWear and selects her occasion (Wedding) from the home grid. She browses the curated looks for that event.

App. response:

The grid offers 12 typical occasions. If the event is unlisted, an AI assistant is available to describe the unique event.

S01 Occasion start

S02 Look inspiration

Step 2 : Size & Dates

User actions:

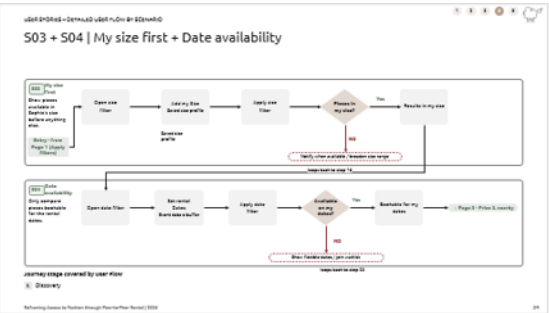

Sophie applies the core discovery filters: she confirms her size (pre-filled from her profile), then sets her rental dates around the event.

App. response:

Results narrow to pieces available in her size AND on her dates. If zero results, the system offers to broaden size range or show flexible dates.

S03 My size first

S04 Date availability

Step 3 : Price & Proximity

User actions:

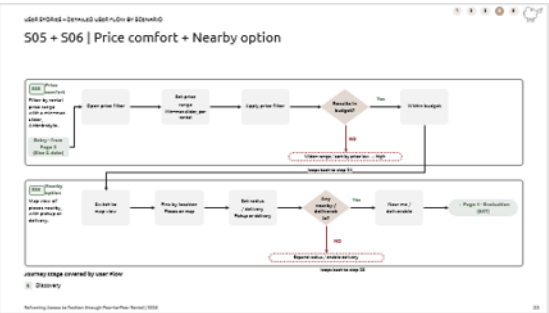

Sophie optionally refines by budget (min-max slider) and by location (map view, radius, pickup or delivery). Both filters are skippable.

App. response:

A price histogram helps Sophie set a realistic range. The map shows owner location pins. If nothing nearby: expand radius or enable delivery.

S05 Price comfort

S06 Nearby option

Step 4 : Evaluation & Decision

User actions:

Sophie opens a piece detail. She views the gallery (4 angles + fabric zoom), reads the size/condition sheet, checks the fit against her profile and can ask the owner a question.

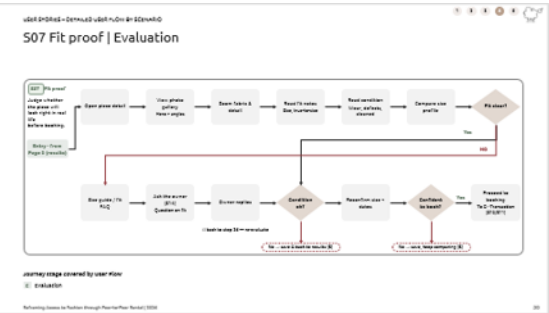

App. response:

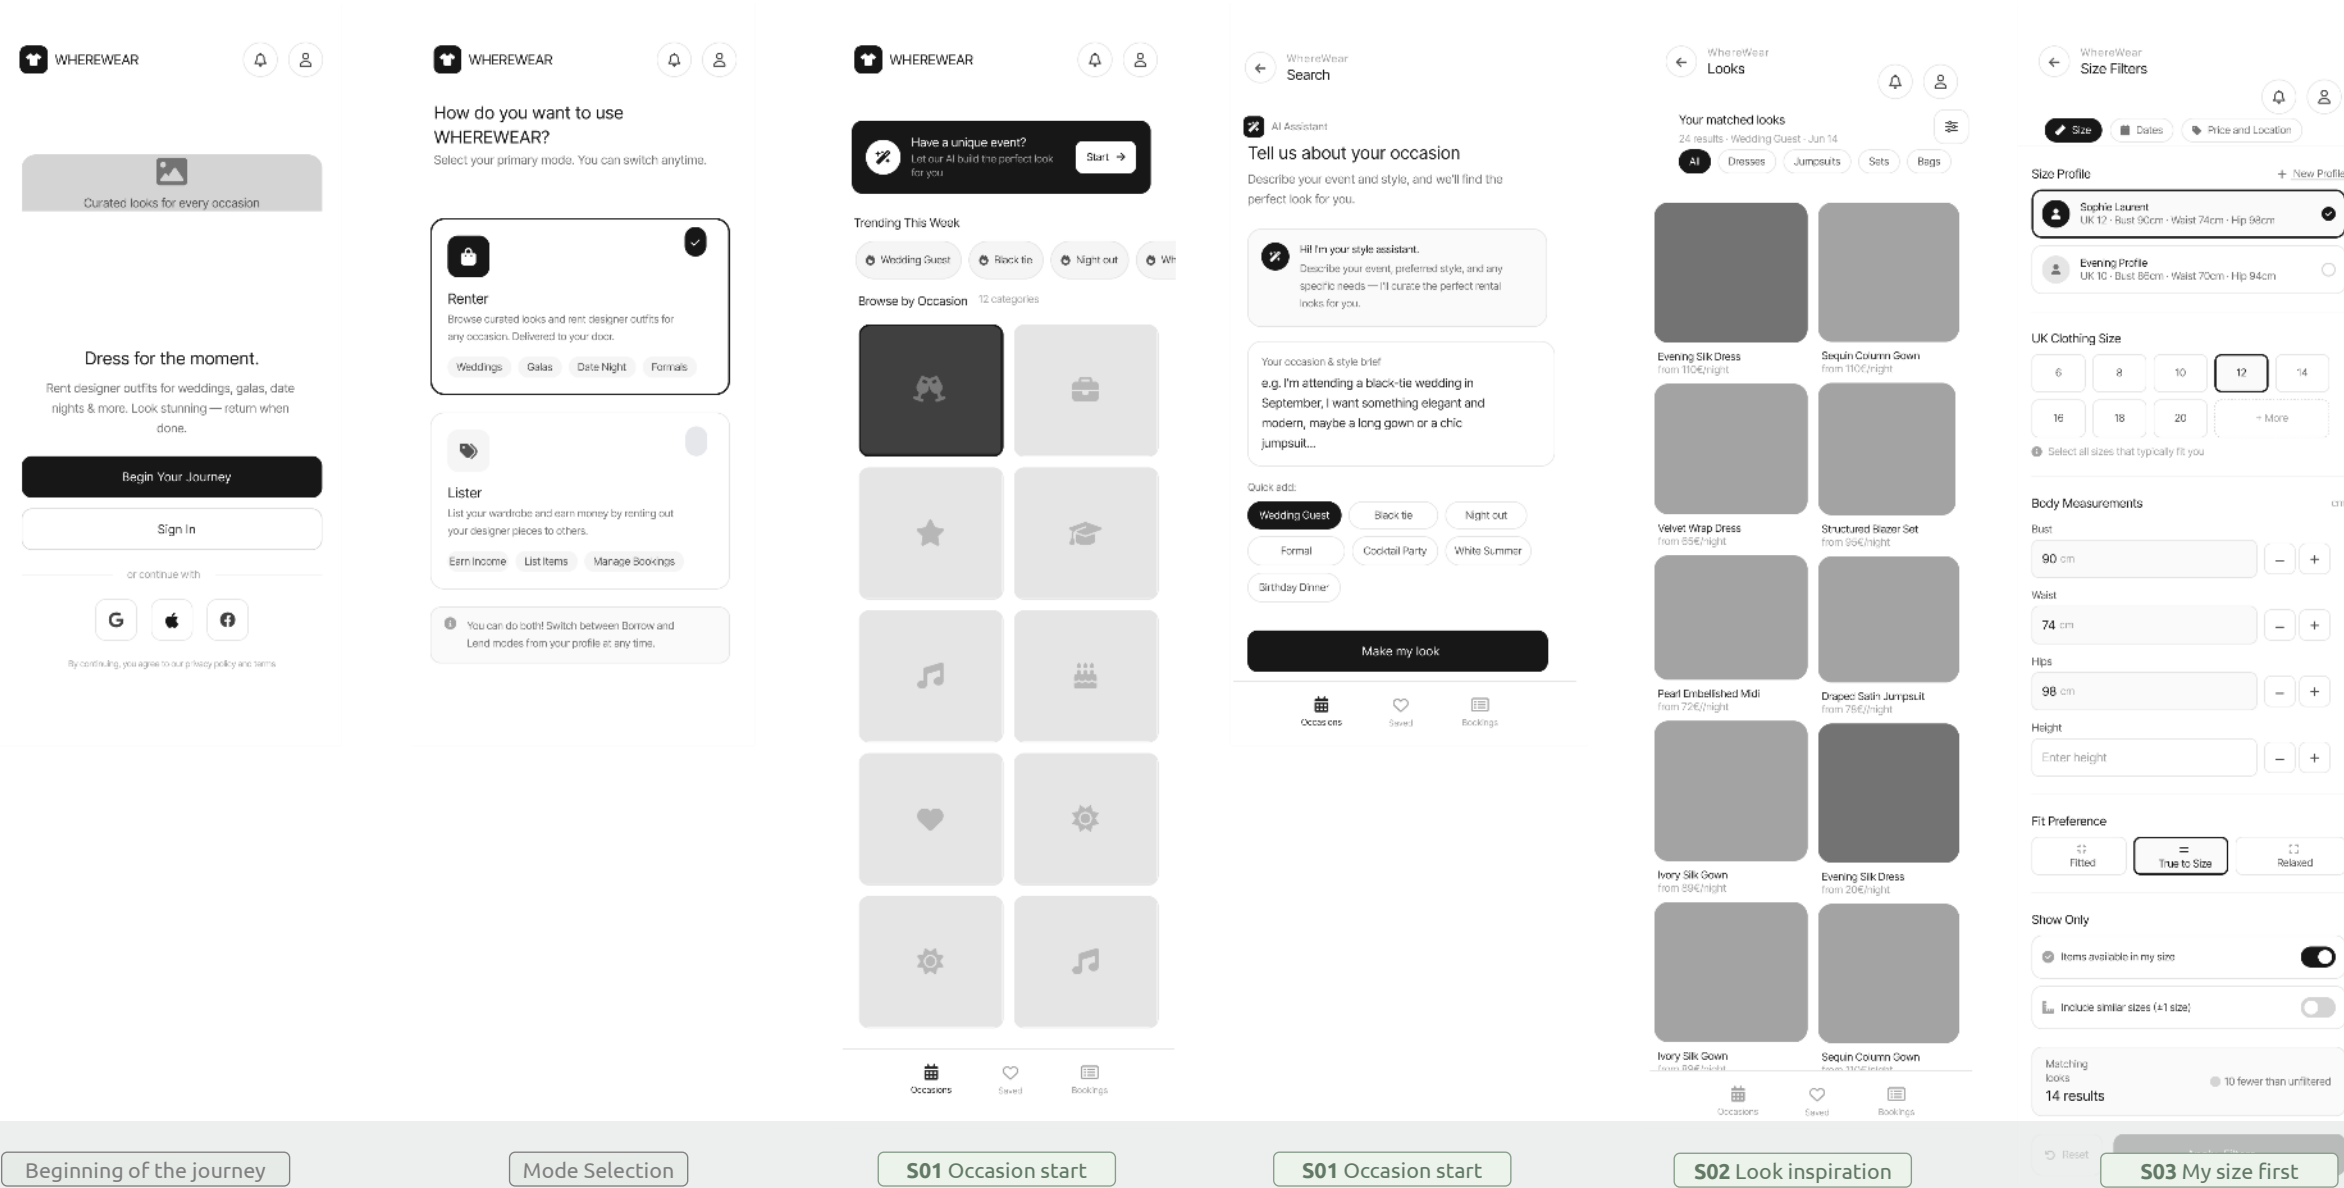

Swipeable gallery, full fit sheet (label size, true-to-size, condition, defects, fabric), size match vs profile, rated owner card.
